

CLEARED 2DRIVE

SERVICED BY CENTERLINE

Centerline helps company achieve full compliance and rapid growth

CLIENT

5F Freight connects drivers and owner operators with bulk logistics work across North America through their mobile app.

CHALLENGE

As a startup, 5F was growing rapidly but lacked the in-house staff to fully support a compliance team. With only a few team members, they feared they could not adequately process all their compliance files including driver qualifications and onboarding. The Centerline team and their Cleared2Drive program was brought on to help with the compliance processing and increase the bandwidth of a small team.

STRATEGY

The Centerline team was brought in to help 5F process their compliance files, especially their driver DOT file qualification. Our team spent time with 5F to learn their needs and compliance requirements.

Then our Cleared2Drive team began by processing driver files, seeing if they met 5F's requirements and then sending to the 5F team for final sign off. Because of this, they were able to save their team a lot of time and ensured they were able to focus on other parts of the business. With such rapid growth, the Centerline team also provided compliance support for big hiring pushes and were available to answer any questions that the 5F team had.

I'm not staying up at night wondering if compliance is being taken care. I feel comfortable knowing the Centerline team is taking care of it.

– Jory Snider, QHSE Compliance Director, 5F Freight

Centerline helps company achieve full compliance and rapid growth

STRATEGY (CONTINUED)

The Centerline team also helped trained their new compliance team hires when the team eventually expanded. Our team became an extension of their team to help provide compliance support that saves them time and peace of mind to know it is being done correctly.

RESULTS

The Centerline team helped 5F achieve some amazing growth goals. In eight (8) months, they went from zero drivers to 400 with driver qualifications. Without Centerline, they wouldn't have been able to achieve the growth they've had because their team would have been bogged down with compliance processing.

Our Cleared2Drive solution freed up 25+ hours a week for 5F team to focus on growing other parts of their business. Our compliance expertise has been proven and they are confident in our ability to take care of any issue they may have.
